

FEATHER RIVER AIR QUALITY MANAGEMENT DISTRICT  
MEMORANDUM  
12/04/2023

TO: FRAQMD BOARD OF DIRECTORS  
FROM: Christopher D. Brown, AICP, APCO  
SUBJECT: Public Hearing to Present the Annual Report on the District's AB2588 Air Toxics "Hot Spots" Program.

---

RECOMMENDATION:

None, informational item only.

BACKGROUND:

The California Health and Safety Code section 44363 requires the District to prepare and publish an annual report that:

1. Describes the priorities and categories of the permitted facilities and summarizes the results of health risk assessments.
2. Ranks and identifies facilities according to the degree of cancer risk posed to the public.
3. Identifies facilities which expose the public to noncancer health risks.
4. Describes the status of the development of control measures to reduce emissions of toxic air contaminants.

The HSC § 44363(b) requires that the District Board hold one or more public hearings to present the report and discuss its content and significance. This code section also requires that the District mail a notice of the report's availability to the County Boards of Supervisors, City Councils, and health departments.

DISCUSSION:

The District prepared the Annual Report for the AB 2588 Air Toxics "Hot Spots" Program.

The report is available on the District's website: <https://www.fraqmd.org/air-toxics> and can be made available to interested parties without internet access by calling the District office.

The notice of report availability was mailed on November 27, 2023 to the Sutter and Yuba County Boards of Supervisors, the City Councils of Live Oak, Marysville, Wheatland, and Yuba City, and the Sutter and Yuba County Health Departments.

The report also includes a status update on the Regulation for the Reporting of Criteria Air Pollutants and Toxic Air Contaminants (CTR).

**FISCAL IMPACT:**

None, informational item only.

**ATTACHMENTS:**

Report on the AB 2588 Air Toxics “Hot Spots” Program, November 27, 2023

**Released: November 27, 2023**

## Executive Summary

The Air Toxics “Hot Spots” Information and Assessment Act of 1987 (AB 2588) is a State of California public right-to-know law requiring local air quality management and air pollution control districts to collect information about the location, type, and quantity of toxic compounds emitted into the air from specified local businesses and industry. The AB 2588 Program Annual Report is published to provide the public with information regarding the AB 2588 Program of the Feather River Air Quality Management District (District). The enabling statutes (California Health & Safety Code (HSC) Sections 44300-44394) require the California Air Resources Board (CARB) and local air districts to implement the “Hot Spots” Program. This report describes the current reporting and evaluation status for facilities being tracked under this program. This report is required by California HSC Section 44363.

The goals of the AB 2588 Program are to collect emission data, to identify facilities having localized impacts, to ascertain health risks, and to notify nearby residents of significant risks. The AB 2588 Program requires certain emitters of airborne toxic compounds to submit toxic emissions inventory reports and updates. Facilities meeting certain criteria must also complete health risk assessments. HSC Section 44363 requires that the District Board conduct a public hearing concerning the subject report which must include information on the following:

- 1) The priorities and categories designated pursuant to section 44360 and a summary of results and progress of the health risk assessment program undertaken;
- 2) The ranking and identification of facilities according to the degree of cancer risk posed to surrounding receptors;
- 3) The identification of facilities which expose individuals or populations to any non-cancer health risks; and
- 4) The status of development of control measures to reduce emissions of toxic air contaminants, if any.

This report covers facility operations in calendar year 2022 for which AB 2588 State fees were assessed on October 1, 2023. The District’s status of development of control measures is as of November 1, 2023.

This report also provides an update on the Regulation for the Reporting of Criteria Air Pollutant and Toxic Air Contaminants<sup>1</sup> (CTR) adopted by the California Air Resources Board, effective January 1, 2022. CTR mandated additional emissions reporting requirements for stationary permitted sources.

The District currently has 643 active permits, of which 413 are subject to AB 2588 based on having a permit to operate over 10 tons per year of criteria pollutants except carbon monoxide, or based on Appendix E of the Emission Inventory Criteria and Guidelines<sup>2</sup>. Of those 413, 249 are considered “industrywide” facilities and 115 are “core” facilities. 230 facilities have been evaluated and deemed exempt from AB 2588.

<sup>2</sup> <https://ww3.arb.ca.gov/ab2588/2588guid.htm>

## I. Air Toxics “Hot Spots” Program

The AB 2588 Program established a process to compile an inventory of air toxics emissions from specified facility categories in California and to assess the potential risks to public health as a result of exposure to those emissions. AB 2588 specifies activities that the CARB, the Office of Environmental Health Hazard Assessment (OEHHA), and the districts must carry out to implement the Act.

Facilities are categorized based on their reporting status in the program. Facilities subject to the AB 2588 Program are required to either file an emissions inventory plan and report with the local air district or as an alternative the District prioritizes and conducts the risk assessment as part of a permitting action. The District reviews and approves the plan and reports. The District performs a prioritization score for the facility. If the prioritization score indicates further evaluation is necessary, the facility is required to perform a health risk assessment (HRA). If the results from the HRA indicate a potential significant risk to the public, the facility is required to notify the public exposed to the emissions. A facility subject to the public notification requirement then may need to develop a risk reduction plan to lower the emissions below significance levels. After complying with the initial reporting requirements, based on the prioritization scores or HRA results, facilities may be required to submit update reports every four years.

## II. Update to OEHHA Risk Assessment Guidelines

The passage of the Children’s Health Protection Act of 1999 (SB 25, Stats. 1999) required Office of Environmental Health Hazard Assessment (OEHHA) to re-evaluate the risk assessment methodologies to ensure infants and children are explicitly addressed in assessing risk. In the last decade, advances in science have shown that early-life exposures to air toxics contribute to an increased lifetime risk of developing cancer, or other adverse health effects, compared to exposures that occur in adulthood. In March 2015 OEHHA adopted revisions to the Guidance Manual for the Preparation of Health Risk Assessments<sup>3</sup> to address this greater sensitivity and incorporates the most recent data on childhood and adult exposure to air toxics. The Air Resources Board (working with CAPCOA) adopted Risk Management Guidance<sup>4</sup> implementing the new guidelines in July 2015.

Although emissions levels and actual exposure have not changed, the new methodology calculations will show that some facilities have a 1.5 to 3 times increase in inhalation health risk due to the new awareness of increased sensitivity in infants and children.

## III. The District Prioritization Procedure

The District policy 2.12.1 Facility Prioritization and Risk Assessment Thresholds and associated manuals of operations for prioritization and risk assessment were adopted in May 2017. This policy incorporates the updated risk assessment guidance from OEHHA and CARB.

In the initial years of the AB 2588 Hot Spots Program the District requested emission inventory plans and reports from AB2588 applicable facilities. The District now reviews most facilities priority during the permit evaluation process. The facilities that are reviewed during the permit evaluation process are evaluated based on potential to emit. If a facility is exempt from AB 2588 based on potential to emit, or is subject to AB 2588 and a low priority, no further action is taken under the AB 2588 program

---

<sup>3</sup> <https://oehha.ca.gov/air/crn/notice-adoption-air-toxics-hot-spots-program-guidance-manual-preparation-health-risk-0>

<sup>4</sup> <https://ww3.arb.ca.gov/ab2588/riskassess.htm>

for that facility until they submit an application to modify their permit. If a facility is reviewed under AB 2588 based on potential to emit is determined to be an intermediate priority, the facility is entered into the annual emissions inventory and toxics emissions are reported annually. If a facility is reviewed under AB 2588 based on potential to emit is determined to be a high priority, the facility is entered into the annual emissions inventory and toxic emissions are reported annually, and an HRA or screening HRA will be requested. If the facility’s actual emissions result in a high priority, the facility will be required to pay state AB 2588 fees. The District will prepare the HRA for the industrywide facilities based on the guidelines developed by CAPCOA, CARB, and OEHHA.

Facilities that submit their own emissions inventory plan and report and are prioritized as intermediate must submit a Quadrennial Update Survey every four years. Facilities that submit their own emission inventory plan and report and are prioritized as high must submit an HRA and pay state AB 2588 fees.

The District has established the following prioritization criteria:

<b>Facility Score*</b>	<b>Facility Description</b>
TS ≥ 10	High Priority
1 ≤ TS ≤ 10	Intermediate Priority
TS < 1	Low Priority

\*The facility’s score is determined by the greater of the Carcinogenic Effects calculation or the Non-carcinogenic Effects calculation.

### A. Industrywide Facilities

The District considers retail gas stations, auto body shops, dry cleaners, and diesel engine only facilities to be industrywide facilities. The District uses the industrywide guidelines to assess priority and risk for these facilities.

<b>Industrywide Category</b>	<b>Number of Facilities</b>
Gas Station	80
Autobody Shops	28
Dry Cleaner	1
Diesel Engine Only	140

### B. Core Facilities

Core facilities are the remaining facilities that are subject to the AB 2588 Program and not industrywide facilities.

## IV. Prioritized Facilities and Health Risk Assessments

The District continues the work of reprioritizing facilities under the new guidelines and procedures and requesting updated Health Risk Assessments from facilities that have been prioritized as high.

In 2023 the District focused on reprioritizing emergency diesel engines in accordance with the new guidelines and procedures. District staff reprioritized 53 emergency diesel engine only facilities between December 2022 and November 2023 that had not submitted an application to modify their permits since the new guidelines were effective.

CARB and CAPCOA released new emission factors and an updated industrywide risk assessment guidelines for retail gasoline dispensing facilities (GDF). The District began using the new emission factors and IWD HRA guidelines on May 4, 2022. The updated industrywide risk assessment guidelines has resulted in a lower priority score for retail GDFs as the vapor control devices installed on most GDFs and in newer vehicles reduce the emissions during refueling.

New emission factors for crematories have resulted in higher acute health impacts. This is a result of better data showing higher impacts rather than an increase in emissions. The District completed one HRA for a crematory in 2021 and one in 2022. A third crematory has an HRA pending additional information. The remaining two human crematories shall be re-prioritized in accordance with the new prioritization procedure and updated emission factors.

In the upcoming year the District will continue reviewing source categories, prioritizing facilities using the updated procedure, and request HRA's for high priority facilities. The District continue to use industrywide health risk assessment guidelines from CAPCOA and CARB to perform HRA's for industrywide facilities. In the upcoming calendar year 2024 the guidelines for diesel engines may be released, and once it's released, the District will implement the IWD HRA guidelines for diesel engines on high priority diesel engine only facilities.

The District currently has 643 active facilities, of which 413 are subject to AB 2588 based on having a permit to operate over 10 tons per year of criteria pollutants except carbon monoxide, or based on Appendix E of the Emission Inventory Criteria and Guidelines<sup>5</sup>. Of those 413, 249 are considered "industrywide" facilities. The District has prioritized 99 as low, 214 as intermediate, and 37 as high priority for the AB 2588 Program. The District has 64 facilities that have not yet been reviewed for AB 2588 applicability.

<b>Priority Score</b>	<b>Number of Facilities</b>
Low	99
Intermediate	214
High	37

---

<sup>5</sup> <https://ww3.arb.ca.gov/ab2588/2588guid.htm>

In 2023, District staff identified parachlorobenzotrifluoride, or PCBTF, listed in the chemicals present in auto body paints used at a couple facilities during permit application reviews. PCBTF was designated as an exempt VOC in 1994, which means it has low reactivity for causing ozone, and has become widely used throughout the United States since designation. PCBTF was added to the list of pollutants that must be quantified as part of the updates to the AB 2588 and CTR updates in 2020. Since this date permit applications are now being reviewed for use of coatings or solvents that contain PCBTF and prioritizations are including PCBTF.

The OEHHA has established unit risk factors (URFs) for PCBTF. CARB has not identified it as a “toxic air contaminant” as of November 2023. PCBTF is used in autobody coatings, other coatings, and solvents.

Recent permit applications for autobody shops have required updated SDS for coatings and solvents that, upon review, show variable percentages of PCBTF. The presence of PCBTF has resulted in high priority based on PTE. There are no additional technologies or toxics best available control devices for the use of coatings in auto body shops. Further, requiring additional control devices or limiting throughput of coatings containing PCBTF in some autobody shops, but not all, creates an unfair economic burden on the facilities that have recently applied for changes to their permits. The District has sought guidance from CARB stated they are aware of the issue and at this time defer to air districts regarding issuing permits for PCBTF-containing compounds and to manufacturers to reformulate products.

The District has consulted with other air districts and found PCBTF use occurs statewide. In districts where they are evaluating the toxics risk (some districts are not currently evaluating it), the chemical is resulting in high prioritizations. Some districts are conducting additional research, others are beginning to require more recordkeeping, and some are limiting throughput in new auto body permits. Limiting throughput in new auto body permits is expected to result in an inability to issue permits as the lower limit is not economically feasible, thus transferring emissions of PCBTF from new shops to existing shops.

The District adopted interim permit guidance regarding how to prioritize facilities that use PCBTF. If the prioritization results are “high” and the driving contributor is PCBTF, the District shall deviate from Policy 2.12.1 and issue the permit without a Health Risk Assessment. This guidance will be in effect for one year from the date of APCO approval, until May 2024.

The addition of PCBTF to the facility prioritization has caused the cancer priority score to increase to over 200 for the two auto body shops evaluated thus far. The applications did not seek to increase the use of PCBTF, and this was not the case of an increase in emissions, but rather better data and new standards show an increased risk from existing sources.

The top 10 highest priority facilities for cancer in the District based on 2022 emissions are listed in the table below.

Permit ID	Facility Name	Location	City	Equipment Type/Process	Cancer Priority Score	HRA Score
11051	Miracle Auto Painting of Yuba City	871 Garden Highway	Yuba City	Automotive Paint Shop	255*	Pending IWD HRA Guidelines
11040	The Body Shop of Yuba City	802 Forbes Avenue	Yuba City	Automotive Paint Shop	245.17*	Pending IWD HRA Guidelines
37020	Unity Forest Products	1162 Putman Ave	Yuba City	Diesel engine	105.139	3.8 per million
23002	Fremont-Rideout Health Group	726 Fourth Street	Marysville	Diesel engine	59	Pending IWD HRA Guidelines
23001	Willow Glen Community Partners, LP	1251 Stabler Lane	Yuba City	Diesel engine	50.82	Pending IWD HRA Guidelines
23058	City of Marysville	1121 17th Street	Marysville	Diesel engine	38.6	Pending IWD HRA Guidelines
28012	Heaven's Gate LLC	603 4th Street	Wheatland	Pet Crematory	35.52	9.25 per million
23004	SBC / Pacific Bell	960 Franklin Ave.	Yuba City	Diesel engine	34.7	Pending IWD HRA Guidelines
23047	SBC / Pacific Bell	421 F Street	Marysville	Diesel engine	34.7	Pending IWD HRA Guidelines
25008	Empire Steel	3094 N Township Road	Yuba City	Diesel engine	26.55	Pending IWD HRA Guidelines

\*See section IV regarding addition of PCBTF to prioritizations

The top ten highest score for non-cancer acute priority in the District are:

Permit ID	Facility Name	Location	City	Type of Facility/ Equipment	Acute Priority Score	HRA Score*
22006	DeSilva Gates Construction	4317 Hammonton Road	Marysville	Asphalt Batch Plant	10.527	0.1
34012	Howard Dryer Company	2179 Franklin Road	Yuba City	prune dryer/boilers	9.63	
33027	Richland Hulling & Drying	6030 Carlson Road	Yuba City	Walnut Huller/Dryer	9.23	
24013	D & D Cabinets - Savage Designs	1478 Sky Harbor Drive	Olivehurst	Wood Products Coating	7.28	
6017	Van Dyke's Rice Dryer Inc.	4036 Pleasant Grove Road	Pleasant Grove	Rice Dryer	5.7	
14051	Honeycutt Aviation	1489 "A" Sky Harbor Drive	Olivehurst	Retail GDF	5.12	
5004	Ramos Oil Company	429 12th Street	Marysville	Bulk Gasoline	5.08	
6010	District 10 Dryers, LLC	8923 Highway 70	Marysville	Rice Dryer	4.48	
14023	Collins Lake Recreation	7530 Collins Lake Road	Browns Valley	Retail GDF	4.42	
21041	Davis Machine Shop Inc	15805 Central Street	Meridian	Private Gasoline Storage/Dispensing	4.275	

\*HRA not required if priority score is less than 10

The top ten highest score for non-cancer chronic priority in the District are:

Permit ID	Facility Name	Location	City	Type of Facility/Equipment	Chronic Priority Score	HRA Score*
6015	Sutter Rice Company	1421 Acacia Road	Sutter	Rice Dryer	7.5	
6010	District 10 Dryers	8923 Highway 70	Marysville	Rice Dryer	5.54	
11065	Sweco Products, Inc.	2455 Palm Street	Sutter	Farm Equipment	4.59	
34012	Howard Dryer Co	2179 Franklin Road	Yuba City	Prune dryer	4.28	
8001	HAANAH COMPANY	1394 Sky Harbor Dr	Olivehurst	Fiberglass	3.9	
33027	Richland Hulling & Drying	6030 Carlson Road	Yuba City	Walnut Huller/Dryer	3.7	
28010	Chapel of the Twin Cities	715 Shasta Street	Yuba City	Human Cremator	3.4	
28007	Lakeside Colonial Chapel	830 D Street	Marysville	Human Cremator	3.4	
3002	Butte Sand & Gravel	10373 South Butte	Sutter	Aggregate	3.01	
6023	Big Sack Inc	5370 W. Riego Rd	Sacramento	Rice Dryer	2.91	

## V. State AB 2588 Program Fees

CARB is required to adopt a fee recovery regulation to assess fees on facilities subject to the requirements to ensure that costs to implement and administer the AB 2588 Program.

Program costs are recovered by assessing a fee to subject facilities. For 2022 emissions the State AB 2588 Program fees totaled \$4403.

There were 17 facilities that were prioritized as High for 2022 emissions and were subject to state AB 2588 fees. Six are core facilities and the remaining 11 are industrywide facilities. The six core facilities are listed below:

Permit ID	Facility Name	Address	City	Equipment Type/Process	State Fees Charged
10001	City of Yuba City	302 Burns Drive	Yuba City	POTW	\$2,009
22006	DeSilva Gates	4317 Hammonton Rd	Marysville	Asphalt	\$134
28005	FPG California, Inc.	817 Almond St.	Yuba City	Human Cremator	\$1,674
28007	Lakeside Chapel	830 D Street	Marysville	Human Cremator	\$67
28010	Chapel of the Twin Cities	1421 Acacia Rd	Yuba City	Human Cremator	\$67
28012	Heaven's Gate	603 4 <sup>th</sup> Street	Wheatland	Pet Cremator	\$67

There are two facilities that were prioritized as high but are exempt from AB 2588 fees due to Health and Safety Code section 44380.1. These are:

Permit ID	Facility Name	Address	City	Equipment Type/Process	Priority
6010	District 10 Dryer	8923 Hwy 70	Marysville	Rice Dryer	18.9
6015	Sutter Rice Company	1421 Acacia Road	Sutter	Rice Dryer	18.5

## VI. Control Measure Development

The District has not developed nor adopted any control measures to reduce emissions of toxic air contaminants in the past year.

## VII. Regulation for the Reporting of Criteria Air Pollutants and Toxic Air Contaminants (CTR)

The Emission Inventory Criteria and Guidelines were updated effective March 2022, including the applicability table in Appendix E<sup>6</sup>. Beginning in 2025 for operations in 2024, many more facilities will be subject to the AB 2588 program, including any using diesel engines over 5 hours per year.

The initial CTR regulation as adopted in 2018 required annual criteria and toxic emissions reporting for three types of facilities:

<sup>6</sup> <https://ww2.arb.ca.gov/sites/default/files/barcu/regact/2020/hotspots2020/eicgappefro.pdf>

1. A facility that is required to report to the state board its greenhouse gas emissions pursuant to Health and Safety Code section 38530.
2. A facility located in an air district designated as nonattainment for any NAAQS or CAAQS with a potential to emit of 250 or more tons per year of nonattainment pollutants.
3. A facility that is categorized by the air district as high priority for toxic air contaminant emissions pursuant to H&SC section 44360.

Facilities under the first two applicability's were required to report emissions for 2020 operations and facilities subject under the third applicability were required to report emissions for 2021 operations.

ARB has not provided districts with a reporting form to collect the information from facilities or an online database to allow facilities to fulfill CTR requirements online. The District has provided facilities information on the CTR requirements and has utilized grant funding to enter facility information into the current emissions reporting database that were subject under the initial CTR regulation.

The number of GHG reporting facilities and high priority reporting facilities increased from 50 to 59 based on 2022 operations.

CTR Applicability	# Facilities in 2021	# Facilities in 2022
GHG Reporting	21	22
NSR Pollutant >250 tons	0	0
High Priority	29	37
<b>Total CTR Applicable Operations</b>	<b>50</b>	<b>59</b>

## VIII. 2020 Amendments to CTR

On November 19, 2020, ARB adopted amendments to the CTR regulation, greatly expanding the applicability of the reporting requirements for AB 2588 (and emissions reporting). The amendments were effective January 1, 2022. The amended CTR regulation will expand applicability for AB 2588 to the types of facilities in the table below beginning with 2024 operations reported in 2025.

The District is required to review the facilities under AB 2588 using 2024 operations and emissions. By April 1, 2024, the District will notify the affected facilities and let them know whether:

- The District will include their emissions on an Industrywide Emissions Inventory. The facility must submit the 2024 Throughput Report no later than February 28, 2025. No further information will be required.
- The District will be prioritizing the facility based on their 2024 Throughput, which must be received no later than February 28, 2025.

Facilities that are prioritized as Low will not be added to the toxics emissions inventory and will not be required to report further under AB 2588 (Note that Low priority facilities may still need to report toxics emissions to ARB directly under the CTR).

Facilities prioritized as Intermediate will have their toxics and criteria emissions reported on the 2024 emissions inventory submitted to ARB in August 2025.

Facilities prioritized as High may be required to submit an Emissions Inventory Plan and Report or Health Risk Assessment.

The District reviewed permit databases and estimated the number of permits affected and facilities for each sector except sectors 8 and 16. The results of this review are provided in the table below. This is an estimate and further information may result in facilities being added or removed from the list. There are potentially hundreds of affected facilities for sectors 8 and 16 which will require additional staff review.

Sector #	Process or Activity	Potential # of Permits	Potentially Affected Facility Permit # and Name*
1	Metal plating, anodizing, or grinding using cadmium or chromium	1	19003 Rodriguez All Bumper Repair
2	Plating, polishing, coating etc using chromium, cadmium, or nickel		Same as above
3	Petroleum refining	0	
4	Industrial Machinery Manufacturing	1	24016 Kingsbury
5	Release of fumigants	11	6008 Gibbs; 16000 Sacramento Packing; 16002 Wilbur Packing; 33010 Judge Farms; 33020 Windswept; 33023 Sutter Buttes Mercantile; 33027 Richland; 34012 Howard Dryer; 34014 Wilbur Ranch Dryer; 34015 Valley Fine Foods; and 34016 Shoei
6	Rubber and misc plastic products manufacturing	0	
7	Process emitting 1,4-dioxane	2	15001 Appeal Democrat; 15002 Deluxe Packages
8	Combustion of diesel over 5 hours per year	Hundreds	Not identified at this time
9	Process emitting styrene	2	8005 Oldcastle; 8006 Baked Industries
10	Methylene chloride use	Unknown	None identified at this time
11	Paint stripping and varnish stripping	Unknown	None identified at this time
12	Use of N-methyl pyrrolidone	Unknown	None identified at this time

13	Dry cleaning facilities	1	12000 Town Cleaners
14	Tert-butyl acetate use	Unknown	None identified at this time
15	Use of PCBTF	2	Both identified facilities are auto body shops and not subject to reporting until 2026.
16	Solvent cleaning and degreasing	Unknown	Potentially hundreds

\*Permit numbers can be used to identify facility location and current status in AB 2588 in Appendix A

The amended CTR regulation further expands applicability for AB 2588 review to most permitted facilities in the District between 2026 and 2028. The exemptions may be facilities that have a private gasoline tank, a small natural gas boiler, or a propane/natural gas fired backup generator.

The amended CTR regulation also expands applicability for enhanced annual emissions reporting. The regulation requires direct reporting to ARB or the District. The District does not have staff or resources to prepare the CTR report on behalf of all applicable facilities under the amended CTR regulation and facilities are recommended to contact ARB directly to report their emissions to comply with CTR or use the online reporting system ARB is developing for CTR reporting, for 2024 data reported in 2025 and future year reporting requirements.

## Appendix A: Facility List

Appendix A includes a list of all facilities currently holding a permit to operate, their location, whether they are subject to AB 2588, whether they are an industrywide source, their priority score and risk information.

The facility list is sorted by permit number.
